Student declaration

Institut d'Enseignement Superieur de Ruhengeri - SWE 3513 Artificial Intelligence

Name: Aisha Niyonsaba
Registration number: 25/27104
Institutional username: ug2527104@ines.ac.rw
Verification code: AI-A2-7104

I declare that:

1. This submission is my own individual work for SWE 3513, Individual Assignment 2.

2. My dataset, seed (7104), verification code (AI-A2-7104), metrics, plots and model behaviour were produced by running my own code with my own registration digits.

3. The dataset is synthetic. I have not used real farmer data, and I have not edited the generated CSV by hand.

4. I used an AI assistant (Claude, Anthropic) to help generate code, tests, documentation and a first draft of the report. This use is fully disclosed in evidence/AI_USE.md.

5. I have read, understood and tested the submitted code and I can explain it and make a small live modification during the defence.

6. I wrote or rewrote in my own words the interpretation of one regression error, one classification error and one farm cluster.

7. I have not shared my seed-specific files or fingerprint with other students and I did not copy another student's work.

8. I understand that mismatched seeds, copied fingerprints, identical explanations or unexplained code may be referred for academic integrity review.
